Miller's Top 5

Check out a portion of a recent blog for getting your home ready for winter- Check out our website miller-restoration.com for more handy tips. Here a just a few....

- 1. Get your mind in the gutters.** Your roof's drainage system annually diverts thousands of gallons of water from your house's exterior and foundation walls. That's why it is so important to keep this system flowing smoothly. Clogged gutters can lead to damaged exterior surfaces and to water in your basement. Before the leaves fly this fall, have your gutters cleaned.....
- 2. Keep the humidifier humming.** You may know that bone dry winter air is bad for your health, but did you also know it can make fine wood more prone to cracking?
- 3. Chill out.** If you live in an area with freezing weather, take steps to ensure that outside faucets and inground irrigation systems don't freeze and burst. Close any shut-off valves serving outside faucets, then, open the outside faucet to drain the line....
- 4. Get on top of roof problems.** Inspect your roof from top to bottom, using binoculars if necessary. Check ridge shingles for cracks and wind damage. Look for damage to metal flashing in valleys and around vents and chimneys. Do not hesitate to call a roofing expert to give it a thorough inspection....
- 5. Smoke and CO detectors.** Replace the batteries in each smoke and carbon monoxide (CO) detector, then vacuum them with a soft brush attachment.

Test the detectors.....
